SAINT-PETERSBURG, CEC EXPOFORUM

AUTOMATION-2024» - THE LARGEST EXHIBITION IN RUSSIA,

which focuses on the automation of production processes and attracts more than 15 000 specialists from the industrial sector of the economy.

Year after year, by strengthening advertising and increasing the flow of professional visitors, we are turning the «Automation» exhibition into an indispensable industry event in Russia and neighboring countries.

In parallel with the «AUTOMATION» exhibition, the specialized exhibition «RADEL-2024» is being held.

Such collaboration allows participants and visitors to experience the synergy of digital electronics with the digitalization of business and life, create a strong newsbreak for partners in order to increase sales, attract a new audience and form a strategy.

Rapid changes in the market, reorientation of the economy, acute supply problems in the field of industrial automation create favorable and, more than ever, profitable conditions for entering the Russian market and the markets of neighboring countries.

The Expoforum exhibition center has convenient transport accessibility, provides exhibitors with first-class exhibition space, and is also a platform for cooperation, trade and experience exchange that meets the highest international standards.

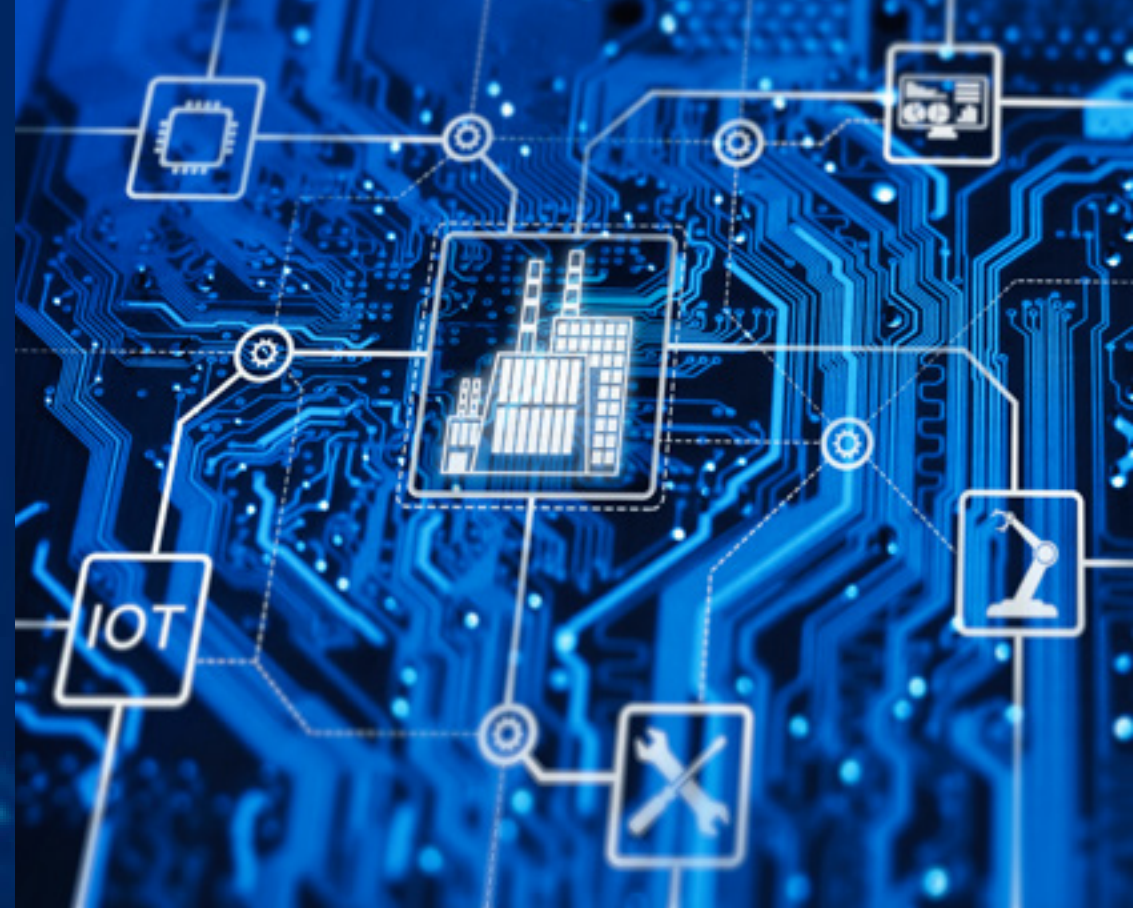

LET'S MOVE FORWARD, CHOOSE WIN-WIN TACTICS!

EXHIBITION TOPIC

Industrial automation

- Industrial personal computers
- Industrial control systems (PLC, SCADA, MES)
- Drivers, sensors, motors, actuators, linear motion systems and positioning
- Embedded systems
- Assembly and processing systems
- Management software production
- Big data, cloud solutions, augmented reality
- Industrial Internet of Things (IIoT)
- Industrial control components

Robotic technologies

- Industrial robots
- Robotic carts
- Machine vision
- Artificial intelligence
- Comprehensive solutions

Devices

- Electrical measuring instruments, as well as for measuring temperature, pressure, flow, level
- Control valves
- System components, connectors
- Cabinets, instrument panels, enclosures, tables, enclosures, pumps, valves, switches, power supply, safety

COLOSSAL CONSUMER POTENTIAL OF THE EXHIBITION AUTOMATION-2024

Automation rests on people, solutions and advanced products. In a professional environment, the stakes are high and good relationships are fundamental. Clients want to meet with manufacturers and integrators and negotiate face to face. They want solutions installed, serviced and supported by qualified companies they trust.

In 2022, the exhibition was visited by 7 900 representatives from more than 200 cities in Russia and 15 foreign countries. In 2023, the exhibition was visited by more than **15 000** specialists. 94% of visitors are top managers and specialists from industrial enterprises, design and engineering organizations.

**NO PARTICIPAITION IN THE EXHIBITION – GIVE YOUR SHARE TO YOUR
DIRECT COMPETITORS!**
